

# How to apply jewels and gems

Application tips for acrylic faceted stones and cabochons

For a **washable garment** to be decorated with stones, use a washable, water based jewel glue. Dimensional fabric paint also works well. Follow the manufacturer's directions.

For **poster or paper** application water based glue or glitter glue works well.

For a handy "picker upper" use removable putty for hanging posters on the wall to pick up stones then place in glue on. This will keep your fingers out of the glue and keeps the glue off the stone decorative surface.
