

## The Beadery® Ornapik™ Heart Frame

Use the attached pattern to Ornapik™ by number and create a frame for your favorite picture. Customize the frame with any colors that you like and even choose the size by adding or removing rings.

### Materials needed:

Ornapiks™

1" thick foam base

---

### Instructions:

**Step 1:** Cut out the heart frame pattern on the next page. The numbers indicate the ring number. If you have a picture that is larger than the center opening, you can cut the inner rings off until the opening is large enough. The table below lists the Ornapik™ count for each size heart ring and the approximate photo size it will frame.

Ring #	Qty Needed	Picture Diameter
1	34	2"
2	40	2¼"
3	46	2¾"
4	70	3¼"
5	62	4"

**Step 2:** Place the pattern on a 1" thick piece of foam with your favorite picture showing through the center hole. This pattern is made to fit on a 4½" or larger base.

**Step 3:** Starting at the point of your centermost ring, push an Ornapik™ through each numbered spot on the pattern. It is easiest to fill the pattern in one ring at a time, starting from one of the points and working around both sides of the ring to meet up in the center. This will create a good heart shape and tight nesting effect.

---

**Ornapik™ Tips:**

- You will not need any glue to hold the pattern or picture. The Ornapik™ will hold it in place.
- If you insert an Ornapik™ and need to move it, they are easily removed and repositioned.
- You can make a solid heart by filling in the white center part with Ornapiks™. It will take an extra 65 Ornapiks™ to fill. You can also expand the hearts by adding more rings on the outside, making sure they nest to fill in all of the space.
- Have fun with colors and patterns.
