

The Beadery[®] Secret Safe

Turn any jar into a decorative safe with a secret hidden compartment. Just follow the simple steps in this project to make your very own secret safe to hide your valuables in plain sight.

Materials needed:

- 1 Jar with Lid
- 1 Cardboard Tube
- 1 pc Flat Cardboard
- Beads

Other items and tools needed:

Pencil, Scissors, Craft Glue

Instructions:

Step 1: Trace the jar opening onto the flat piece of cardboard and cut out the circle. Make sure to cut on the inside of the traced line so the cardboard disk will fit through the jar opening.

Step 2: Trim the cardboard tube to the height of the jar and using craft glue, glue the tube to the center of the cardboard disk from *Step 1*. Allow the glue to dry completely.

Step 3: Insert the cardboard piece into the jar with the flat part resting on the bottom.

Step 4: Fill the space between the jar and the tube with your favorite beads to hide the tube in the center.

Hint: Ball up a piece of paper towel and stuff it into the tube to prevent beads from falling in while filling.

Step 5: Decorate the jar or hide it in plain sight while storing all your valuables inside.
