- Monofilament or String for hanging

Instructions:

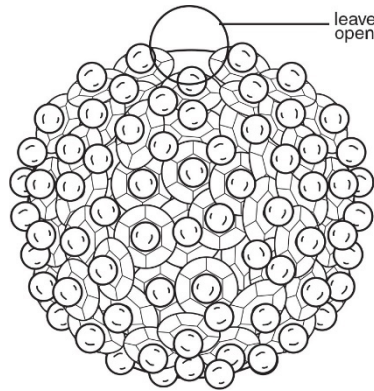

Step 1: Push a sequin onto each Ornapik™ and slide it up to the beaded head. A 2" (5 cm) foam ball should take approximately 130 sequined Ornapiks™ to cover.

Step 2: Push the sequined Ornapiks™ into the ball, alternating colors and overlapping the sequins as you go to create a random effect.

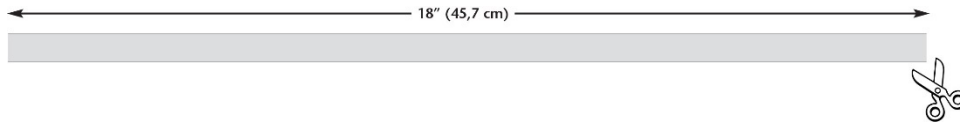

Step 3: Make sure to leave an open space for the last sequined Ornapik™. This will be used to hang the ornament.

*To hang the ornament with a ribbon bow, follow Steps 4-9:
If you want to use a monofilament loop to hang the ornament, skip to Step 10.*

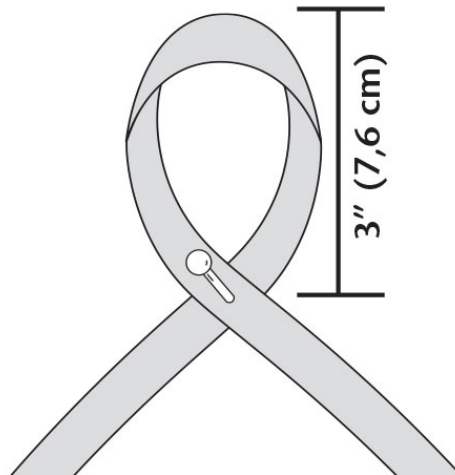

Step 4: Cut an 18" (45.7 cm) piece of ribbon.

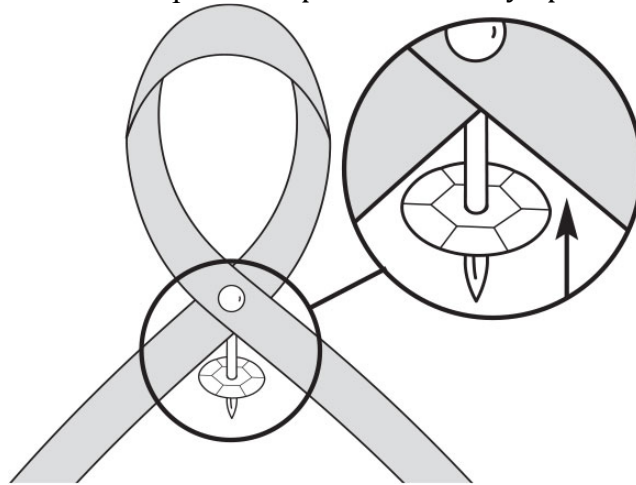

Step 5: Fold the ribbon in half.

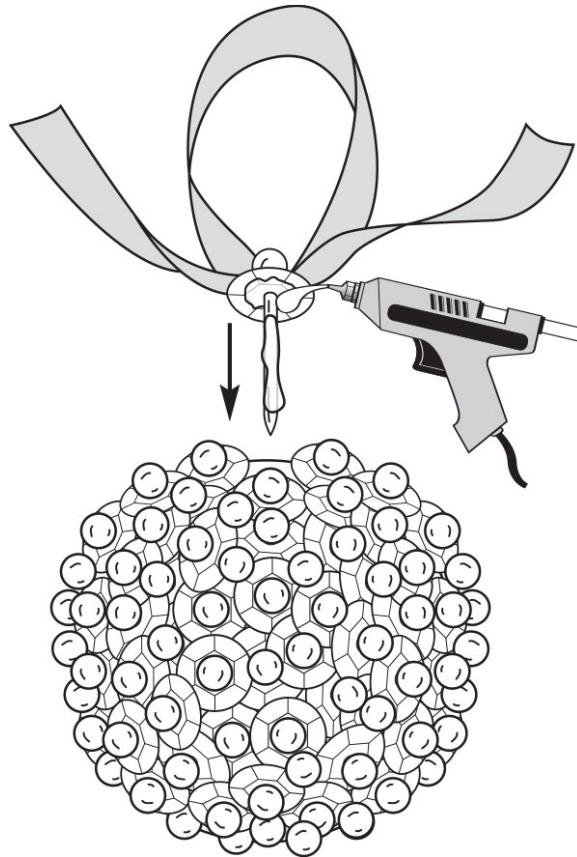

Step 6: Create a 3" (7.6 cm) loop with the ribbon and stick an Ornapik™ through both layers.

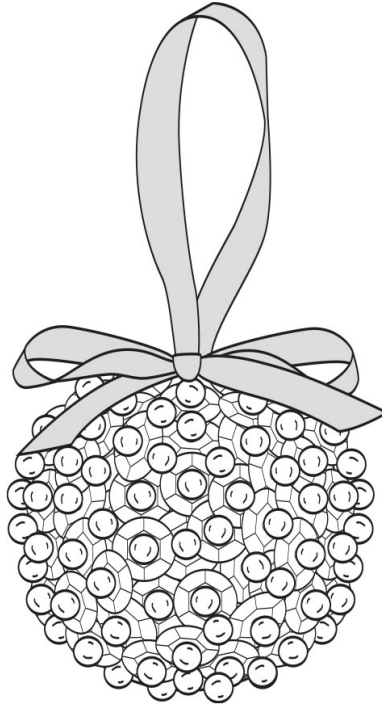

Step 7: Slide a sequin onto the Ornapik™ and push all the way up to the beaded head.

Step 8: Put a drop of craft glue or hot glue on the Ornapik™ and insert into the foam ball in the space left open in *Step 3*. The glue will prevent the Ornapik™ with the hanging ribbon from falling out.

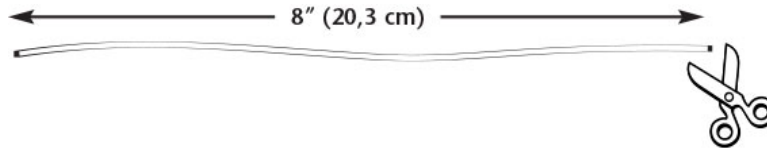

Step 9: Tie the ends of the ribbon to form a bow.

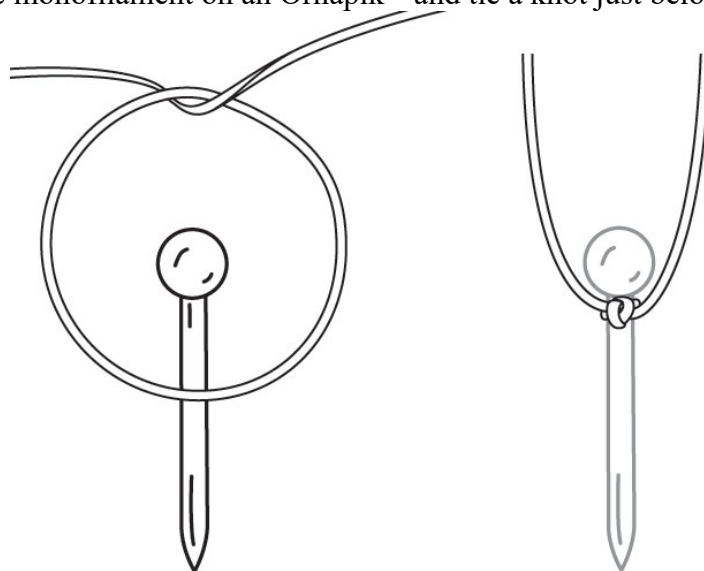

To hang the ornament with monofilament instead of a bow, follow Steps 10-14:

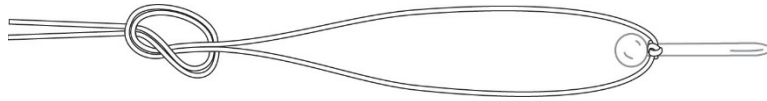

Step 10: Cut an 8" (20.3 cm) piece of monofilament.

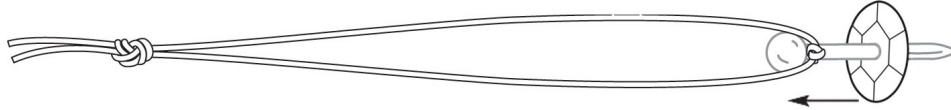

Step 11: Center the monofilament on an Ornapik™ and tie a knot just below the beaded head.

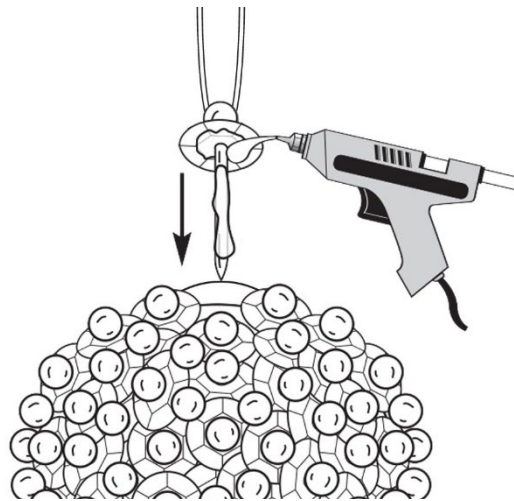

Step 12: Tie a knot to create a hanging loop at desired length.

Step 13: Slide a sequin up to the beaded head of the Ornapik™.

Step 14: Put a drop of craft glue or hot glue on the Ornapik™ and insert into the foam ball in the space left open in Step 3. The glue will prevent the Ornapik™ with the hanging loop from falling out.

Try different color combinations for Ornapiks™ and Sequins to create custom ornaments to match your holiday décor.
